Step 1

Start by sharing what it is you want to create. No need for complicated blueprints. Just tell us what shape of products have in mind. Short on ideas? Our team can help you generate some !

Step 2

Our design will create a digital sample with details and specifications, of how we see your custom shaped products. Once you approve the design, it's be submitted into production. By the way, our rendering look like the real thing.

Step 3

Once the order is in the production, we will create a mold and produce your custom design. Upon completion of production, we will inspect and QA the products. Then will be delivered to you. Shabam! Another happy client. You' ll be the judge.
